Article : Horrors of Terrorism

Introduction :-

The word 'terrorism' refers to the intentional acts of violence that leads to the harming and killing of innocent people and creating an atmosphere of fear in the society. The ultimate aim is to bring a political change using forceful attacks.

Kinds of Terrorism :-

There are six types of terrorism which are as follows —

- (1) Terrorism of state
- (2) Bioterrorism
- (3) Cyber terrorism
- (4) Ecoterrorism
- (5) Nuclear terrorism
- (6) Narcoterrorism etc.

Roll N.-

Terrorism in India :-

Terrorism in India is widespread and there seems to be no end to it. The "Naxal Movement" in Bengal was possibly the first terrorism act in India, which was brutally suppressed by the Congress Government at that time. Gradually it spread to Kerala and Andhra Pradesh. However, this movement unlike other terrorist movements, was for a real cause; to bridge the gap between the rich and the poor.

Conclusion :-

The means of terrorism needs to be tackled on many fronts. The cause of militancy and terrorism should be clearly and precisely identified and remedial steps taken. The Government should come down heavily on the terrorists and answer with bullets as Mr. K.P.S. Gill had done in Punjab.
