

Essay On CoronaVirus or Essay On Covid-19

Outline : -

- i. Introduction
- ii. How does it infect
- iii. Where did corona come from.
- iv. Variants of corona
- v. Symptoms of Corona
- vi. How to avoid corona
- vii. Conclusion.

Introduction : -

Coronaviruses are a family of viruses that can cause respiratory system illness in humans.

They are called "corona" because of crown-like spikes on the surface of the virus.

Sars (SARS), MERS and the common cold are examples of coronaviruses that cause illness in humans.

How does it infect : -

When covid-19 enters your body through your mouth, nose or eyes, the virus travels through your nostrils to your throat and into lung tissue. From there, it spreads to other tissues.

Where did corona come from:—

coronaviruses are often found in bats, cats and camels. The viruses live in but do not infect the animals.

But covid-19 is believed to have originated from the city of Wuhan in China.

Variants of coronavirus:—

Alpha, Beta, Gamma, Delta, Eta etc. Variants of corona have been seen so far.

Symptoms of corona:—

Symptoms appear from 2 to 14 days from the time of infection. There symptoms of common cold.

How to avoid corona:—

To avoid corona, take the following measures:—

- (i) Maintain tow yards distance i.e. follow social-distancing.
- (ii) Wear a Mask.
- (iii) Take immunity boosting diet.
- (iv) Get a covid test done if you have symptoms of common cold.
- (v) Drink Hot water, avoid cold food.

conclusion :-

Thus we see that corona is a dangerous virus. Avoid this and save others. Don't let the rumors spread. Be careful not to be careless.
